PROFESSIONAL SUMMARY

Bachelor of Computer Applications (BCA) student with a strong foundation in programming, full-stack development, and database management. Hands-on experience in Python, JavaScript, MySQL, MERN stack, and AI-based applications through academic projects and internships. Passionate about problem-solving and eager to start a career in software development or IT.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++, PHP

Web Technologies: HTML, CSS

Frameworks & Stacks: MERN Stack

Databases: MySQL

AI & Data: Prompt Engineering, Python for Data Analysis

Core Concepts: Full-Stack Development, Problem Solving, Logical Thinking

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Adaptability
- Self-Motivated Learner

EXPERIENCE

AccelerateX, Kothamangalam, India

Oct 2024

AI Intern – Foundational AI Project

Accomplishments:

- Developed a foundational AI project involving data processing, model building, and deployment.
- Applied machine learning concepts to solve basic real-world problems.
- Worked with AI tools and libraries for building functional AI applications.
- Collaborated with peers under the mentorship of industry professionals.

OWL AI, India

Sep 2025

Front-End Developer Intern

Accomplishments:

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Implemented front-end components following UI/UX guidelines and project requirements.
- Optimized web pages for cross-browser compatibility, mobile responsiveness, and performance.
- Fixed bugs, refactored code, and delivered tasks within deadlines.

Hex Softwares, India

Oct 2025 – Nov 2025

Web Development Intern

Accomplishments:

- Assisted in developing web applications using standard web technologies and best practices.
- Implemented and maintained front-end and back-end features with clean, structured code.
- Participated in testing, debugging, and issue resolution across project modules.
- Improved application functionality, user experience, and system performance.
- Adapted quickly to new tools and delivered quality work in a virtual team environment.

EDUCATION

Online College Election Management System

Rajagiri College of Management and Applied Science | 2022 – 2025

Higher Secondary Education

Cardinal Higher Secondary School | 2020 – 2022

PROJECTS

Online College Election Management System

- Designed and developed a web-based system to manage college elections digitally.
- Implemented front-end and back-end functionalities using HTML, CSS, JavaScript, and MySQL.
- Improved voting transparency and reduced manual effort in election processes.

Online Home IoT Device Store

- Developed an e-commerce platform for smart home IoT devices.
 - Implemented product listing, user interaction, and backend logic.
 - Strengthened full-stack development and database management skills.
-

CERTIFICATIONS

- Advanced Python for Data Analysis
 - Certification in Cybersecurity and Ethical Hacking
 - AI Builders Lab – Google for Developers & Hack2Skill
 - Prompt Engineering Workshop – AI Summit 2024
 - Certification in Robotics
-
